Reduces Snoring

Our nasal clip is scientifically designed to fit seamlessly into your daily routine.

Loved by Thousands

Finally, a product that actually helps with my snoring! My partner sleeps better, and so do I.

Alex R 4.9

How It Works

Using our nasal clip is effortless and effective. Follow these steps to enjoy better airflow and relief from snoring or congestion.

Clean Step 1

Wash your hands thoroughly to remove any oil or dirt from the skin of your nose. It is crucial to keep the applicator clean.

Apply Step 2

Using the applicator, apply one adhesive Tab to each side of your nose. Just above the nostrils. Press each Tab slide pack skin to ensure complete contact. Wait a few minutes before attaching the band.

Tab placement Step 3

There are some tips to use it correctly:

- Place one pinch the tip of the nostril (not on the nostril)
- Keep the Tab dry and clean
- Only contact with skin on the nose, not the cheek. Reduce the spin to ensure the longevity of the Tape.Avoid Lipsoil with the Band and not press hard

Attach Step 4

Place the Lightweight band over your nose. The magnetic ends of the Band will attract the Tabs.

Pro Tip: Make sure the Band is not upside down. The magnets should be facing down.

What's in start kit

- 4 Bands
  You can easily choose which works best for you.
- 15 or 30 Tabs
  Each kit comes with 30 tabs. They're safe for sensitive skin.
- Applicator
  Our medical applicators pick up one pinch Tab precisely.

Real Results You Can Feel

See the difference our nasal clip can make for snoring and airflow.

Flimsy
Nasal strips have very little structure. When you inhale, they can still collapse.

Unsupportive
Nasal strips don't hold your nose open as wide as intake.

Falls off
Strips come up from your nasal strip stuck to your Pillow again.

Hurts your skin
Nasal strips stick to the bridge of your nose using an aggressive adhesive. When you pull it off, your skin goes with it.

Pulls forward
Nasal strips rely on the leverage of your nose bridge to widen the

Actually opens your nose
Intake breath flow, so your nose opens to the size Band you wear. We can open your nose up to 50% more.

Durable
Intake is built strong and durable to your nose Stays open right where you want it, as long as you want it.

Stays on all daylight
Intake will be precisely where you left it when you awaken, keeping your nasal passages open for uninterrupted breathing.

Skin safe
Intake uses a strong magnetic Band to hold your nose open, not the bridge of your nose. We use less adhesive and we care that your skin stays where it belongs—on your nose.

Pulls outward
Intake pulls out at your nose. Using the suction cup like Tabs, the Band.

Customer Feedback

Arlene McCoy 1 Week Ago
(5.M)
This nasal clip has helped me reduce snoring and breathe easier at night. Comfortable and barely noticeable!

Ralph Edwards 1 Week Ago
(5.M)
I use this nasal clip during my runs, and it really improves airflow. I can breathe more freely and last longer during intense sessions.

Cameron Williamson 1 Week Ago
(5.M)
I've been using the nasal clip to combat my chronic nasal congestion, and it's made a world of difference. Highly effective and comfortable!

Backed by Science

Our product is backed by clinical studies that show significant improvement in airflow and reduction in snoring for consistent users.

- Clinical study shows 89% improvement in nasal airflow
- 70% of users report reduced snoring after 2 weeks

Common Questions

- Who is Intake for?
  Everyone. If you snore, have trouble sleeping, wake up with a dry mouth, or want to boost your workouts — try Intake. Intake is for anyone who experiences difficulty breathing or breathing through our nose—until we tried Intake, and realized there was a whole world of air out there that we weren't breathing. Intake is for people who have a history of allergies, sinus infections, a deviated septum, or anything that makes it difficult for you to breathe. Intake may help greatly.
